Paterson, New Jersey

FACT SHEET

PubMed

PubMed is one of the Medical databases included in MEDLINE (MEDlars onLINE), the National Library of Medicine's premier bibliographic database. Internet Grateful Med is its companion in the Medlars system. Articles from more than 3800 international biomedical journals are included in this file of over 9.2 million records.

Time covered - 1966 to the present. (At present, there is an effort to go back to 1960.)

Source - 43,000 journals in about 30 languages currently, and about 40 languages back to 1966; 52% published in the United States.

- 88% of the current references are in English.
- 76% of the references have English abstracts

Weekly update - 73,000 references are added weekly (almost 4 million annually.)

Broad Coverage - Basic research and the clinical sciences - including nursing, dentistry, pharmacy, and allied health.

Access to dedicated scientific databases, such as Nucleotide, Protein, Genome, Structure, and PopSet are available through PubMed.
